Profile
Project Manager |UX Designer | Certified ScrumMaster | SAFe Agilist

Highly Effective Project Manager / Scrum Master with over 5 years of transforming organizations using Agile/Scrum methodology in SDLC. Known for leading successful teams to reach business goals and create value for companies and organizations. Very experienced in applying a wide variety of well-known patterns and techniques, e.g., TDD, SOLID, CI/CD, INVEST etc. Skills in software development and interface design makes working with development teams whether onsite, distributed, or remote interesting for me. I employ metrics reporting skills to help teams, stakeholders, and clients alike to have a broad overview of what work is being done and the overall health status of teams and projects. A passionate leader whose preference is value delivery all the time. Outside of work I am a passionate Liverpool Fc supporter and a chess master.
